RIMAGE 360i™

CREATE. BURN. PRINT.™

Setup and Installation
for Macintosh®

If you are unfamiliar with the procedures in this document, ask your computer technician for help or refer to your computer documentation.

Before you begin:

- You must have administrative privileges to install the Rimage 360i software on your computer.
- Do not plug in any cables until you are instructed to do so.
- Obtain a Macintosh computer that meets the computer specifications listed in the ‘Learn more’ section of the *Rimage 360i User Guide*.

1 Install the Rimage software.

The Rimage software for Macintosh includes an application called Discribe®. Discribe allows you to select data and labels for your discs. After installation, Discribe is located at Applications > Discribe.

ⓘ **Important!** You must have administrative privileges to install the Rimage 360i software on your computer.

a. Power on your computer.

b. At your computer, insert the **Rimage Software for Macintosh CD** in the disc drive.

c. From your computer desktop, select the **Rimage Software CD icon**. The Rimage Software CD contents display.

d. From the software CD, select **Rimage Installer**. The installation window opens.

e. Follow the onscreen prompts to complete the installation.

f. When the installation is complete, select **Quit**.

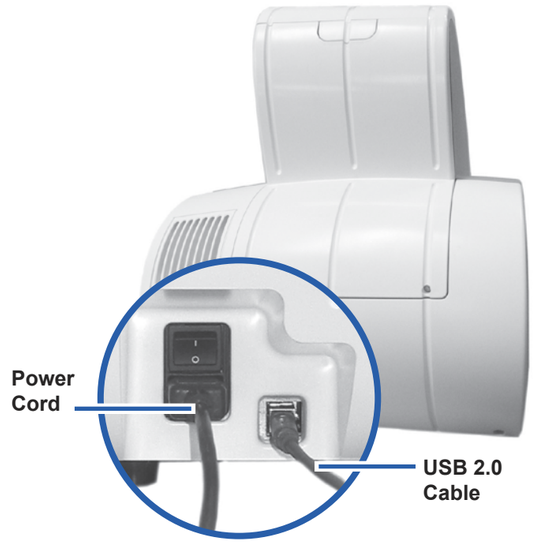
✎ **Note:** If you are prompted to restart your computer, select **Restart**. The software installation completes and the computer restarts.

2 Connect the Rimage 360i cables.

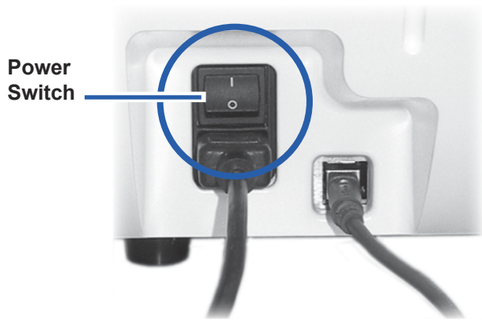
a. Connect the **USB 2.0 cable** from the Rimage 360i to your computer USB 2.0 port.

✎ **Note:** The computer must have a USB 2.0 port. For more information, refer to the computer specifications listed in the ‘Learn More’ section of your *Rimage 360i User Guide.*

b. Connect the **power cord** from the Rimage 360i to a power outlet.



c. To power on the Rimage 360i, press the **power switch**.



3 Add the Rimage 360i to your printer list.

Using OS X v 10.4

a. At your computer, **navigate:** System Preferences > Print & Fax. The *Print & Fax* window opens.

b. From the *Print & Fax* window, select [+]. The *Printer Browser* window opens.

c. From the ***Printer Name*** list, select **360i**.

d. Select **Add**. The printer is added to your printer list and the *Printer Browser* window closes.

e. Close the *Print & Fax* window.

Using OS X v 10.3

a. At your computer, **navigate:** System Preferences > Print & Fax. The *Print & Fax* window opens.

b. From the *Print & Fax* window, select **Setup Printers**. The *Printer List* window opens.

c. From the printer list popup menu, select **USB**. In the printer list, *360i* displays.

d. From the printer list, select **360i**.

e. Select **Add**. The printer is added to your printer list and the *Printer List* window closes.

f. Close the *Print & Fax* window.

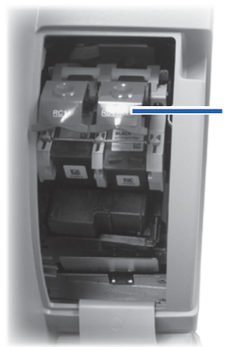
4 Install the ink cartridges.

a. Open the **ink cartridge access door**.

b. When the ink cartridge carriages are still, lift both **cartridge latches**.

c. Slide the matching **ink cartridges** into the matching carriages as shown.

d. Close the **ink cartridge latches**.



e. Close the **ink cartridge access door**. The printer initializes.

f. Align the **ink cartridges**. For specific instructions, refer to the *Rimage 360i User Guide*.

5 Activate your software.

You have 30 days to activate your software. Until your software is activated, you will be prompted to activate your software each time you use it.

6 Learn more.

For more information about operating and maintaining your Rimage 360i, refer to your *Rimage 360i User Guide*.

For information about the Discribe software, refer to the *Discribe User Manual*. After you install the Rimage Software for Macintosh, the *Discribe User Manual* is located on your computer at Applications > Discribe Robot.
